WHEAT POOL CAMPAIGN FOR 10,000 NEW MEMBERS

Alberta grain growers are advised that the Alberta Wheat Pool has inaugurated a new campaign for membership and that this campaign is being conducted on a different basis than in the past, either in Alberta or the other two prairie provinces.

The wheat pool idea had its genesis in this province. Here the original plan was worked out. The legal details in connection with incorporation, the memorandum of association, the members' agreement, and the by-laws were first considered in Alberta, and, when carefully perfected, were the basis for the organizations subsequently brought into existence in Saskatchewan and Manitoba.

Each of the success of the pool method of marketing in western Canada is attributable to the infinite care that was exercised in Alberta at the beginning when those in charge of organization had this work in hand. The wheat pool here had made remarkable progress. It has won the confidence of the people of the province. Those who entered it at the beginning are satisfied, and thousands who then waited to see how things would turn out have since been so impressed that they have joined the pool for the balance of the term of the contract, namely, until the 1927 crop is marketed.

The success of the last two years has encouraged the directors of the wheat pool to authorize a new campaign for members at this time. This campaign is now being carried on until the end of the year. In the past all canvassing had been done voluntarily with no payment for services rendered, but the board of directors feel now that it would be unfair to ask the workers to undertake work along this line without payment to offset the time lost and expense incurred in the task of securing memberships.

This membership campaign therefore is open to anyone who wishes to join in the canvass, but no commission will be paid to any member of the board of directors or to any member of the association. Delegates and local secretaries are eligible to participate in the canvass and receive commissions.

The commission will be \$150 per contract. If the fee is paid in cash—the fee is \$5—the canvasser may remit \$150 to the head office of the wheat pool in Calgary and retain the balance as his commission. When the note form is signed by the grower on the contract sent in, the sum of \$150 will be sent by the head office to the canvasser, but it will be a loan to the wheat producer of the province, the contract must be complete as to the full name of the grower, his address, location of land and number of acres sown to wheat in 1925, and the sign-
tury properly witnessed.

Contract forms, canvassers' reports and self-addressed envelopes are being sent to all wheat pool delegates, wheat pool secretaries, secretaries of the U.P.A. locals, and municipal secretaries, to any of whom canvassers may apply for supplies, or they may send direct to the head office of the pool in Calgary.

The membership campaign which has now been started aims at raising the membership from 32,000 to 42,000 which, in the average of acreage, will bring the total acreage in the pool to 4,200,000 acres.

FINAL PAYMENTS HAIL INSURANCE

The officers of the Hail Insurance Board of Alberta presented a busy appearance on Saturday. This was owing to the final payments that are being made in connection with this season's claims.

H. H. Towell, the manager, stated that the total claims this year would amount to something like \$680,000. Immediately after damage inspection a first payment was made, but 10 per cent of the insurance carried was held to cover the premium, in accordance with the Hail Insurance Act. Now that a rate of 7 per cent has been set by the board, the difference between that and 10 per cent was being mailed to claimants.

It was stated by Mr. Towell that there had been about 1,500 claims altogether, and that the amount now being disbursed would approximate \$40,000. The largest claim of any one farmer had been \$14,000.

THREE POLITICAL CONVENTIONS HERE

Three political nominating conventions will be held in Wetaskiwin during the week.

The first meeting will be held today (Thursday) when the Conservatives of the provincial riding of Wetaskiwin will assemble at the Criterion hotel at two o'clock p.m. to choose delegates for the federal convention to be held at the Angus Theatre at 2:30 p.m. the same day, when a candidate will likely be chosen for the forthcoming election.

The Liberals for the newly formed constituency of Wetaskiwin will meet in open convention in the Angus Theatre on Monday of next week, at two o'clock for the purpose of selecting a candidate as the standard bearer for the pending election. Hon. Charles Stewart, minister of the interior, will be present and address the meeting.

S. SMITH PRESENTS
CHILDREN WITH
EUROPEAN GIFTS

C. Smith, chairman of the Catholic school board presented the children with various prizes collected during his travel in the old country and Europe, on the school grounds on Monday evening. These prizes were awarded for good conduct during his absence. Amongst them was a Swiss watch, pearl earrings, from Rhelms and knives from Sheffield, German silver purses for the girls, and pendants from Poland. After the presentation a nice display of fireworks took place and ice cream cones for everybody concluded the pleasant evening.

The following were the prize winners:

For punctuality and application—Emeline Aboussey, Patrick Oakes. Good conduct and religious instruction—Lillian Caine, Ralph Oakes. Cleanliness and good manners—Dora Baxter, Rellie Miquelin. Politeness—Eveline Bourque, Irene Schmitz, Cecil McIlhenny. Oral composition—Mary Oakes, and Rene Begun.

Writing—Theresa McCoy, Henry Kolke.

GEO. ROOT TAKES ADVANCED STEP

The new fifty foot grain elevator built by Geo. F. Root on Fair Acres Farm is a very practical advertisement of the fertility of the Wetaskiwin district. It has a capacity of 25,000 bushels, and is equipped with modern dumping, elevating and cleaning machinery. Mr. Root, who is widely known as a livestock breeder and feeder, is also a progressive grain farmer. He believes that owning your own storage plant, cleaning and mixing the grain, and utilizing all the advantages on your own premises, will not only increase market returns for cereal products, but assist materially in controlling the noxious and useless weeds problem.

CORRECTION

In our last issue we referred to the demise of Mrs. Martha Scharte. This is not entirely correct, as the name should have read Mrs. Mathilda Scharte. We regret the error, but in explanation may state that we followed the copy as handed into the office by a correspondent.

HOSPITAL DONATIONS ARE ACKNOWLEDGED

The matron and staff of the Wetaskiwin Hospital publicly acknowledge the following donations recently received:

One dozen cups and saucers; half dozen soup dishes; half dozen towels; ladies' and half dozen towels, from Ladies' Hospital Aid.

Six chickens from E. E. Struheim. Sack of rice, and box of chocolates and fruit for nurses from J. Das. Chocolates from Mrs. James. Cabbage from Mrs. N. A. MacEachern.

Two chickens from Mrs. A. Hladik. J. J. Joliffe, from Mrs. C. French. Flowers from Mrs. H. J. Montgomery. Mrs. Vaughn, W. Holmes, P. C. Peterson, and Mrs. Somers. Flowers and celery from J. P. Ellis. Vegetables from Wetaskiwin Exhibition association.

Three baskets fruit from C. Maynard.

Mr. McLean, of Perth, Ont., spent the weekend at the home of his brother, Mr. A. McLean, north of the city.

CIVIC HOLIDAY THURSDAY NEXT

His Worship, Mayor Montgomery has declared Thursday of next week, October 1, as Civic Holiday, when all places of business in Wetaskiwin will be closed. This is the opening of the chicken shooting season.

OBITUARY

MRS. DUGGER

Another of the early settlers of the district passed away at her home in the city on Sunday, in the person of Sarah, relict of the late Carl Dugger, at the age of sixty-seven years. The funeral took place on Wednesday afternoon of this week, services being conducted in the former Methodist church, by Rev. A. R. Aldridge. The interment was made in the family plot in the Wetaskiwin cemetery. We will make further reference to the deceased in next week's issue.

CAMPERS AT LAKE WANT PROTECTION

A meeting of owners of cottages at Ma-Me-O Beach was held in the council chamber on Monday evening, when the following officers were elected: President, A. A. Ellis; secretary, J. W. Somers, Geo. Grabner, J. I. Poole, E. T. Williamson, and C. E. Compton, with the president and secretary.

After a lengthy discussion regarding the protection of property at the lake, the secretary was requested by resolution, to write Inspector Pickett at Red Deer, pointing out that the summer cottages at Ma-Me-O Beach have been repeatedly broken into during the unoccupied season, and requesting that he give his officer in the district instructions to give better protection to the property if possible.

Cards will be printed and tacked on the cottages offering a reward of \$25.00 for the conviction of any person or persons breaking into the cottages. An assessment of \$2.00 per cottage was made to meet the expenses of the association.

EFFICIENT CHOIR LEADER ENGAGED

The choir of the United church have secured the services of Mr. L. D. Wright as leader and organist, and he will be here at the end of the month to assume his new duties. Mr. Wright is a native of Ireland and comes of a musical family, as his eldest sister, who is residing in Dublin Castle at the age of nine years and his father's orchestra played before the present King of England. His first experience in choir work was when he joined the choir of St. Peter's church, Belfast, in 1905, Mr. A. M. Gifford, L.L.B., being then organist and choir-master. He went to Leithridge in 1919, where he has two sisters, both accomplished musicians. His first vocal experience in the musical examinations in Leithridge was successful in passing the primary grade (pianoforte) after five months' tuition, and he has taken a prominent part in musical affairs in Leithridge and Taber ever since.

For the last two years Mr. Wright has been organist and choir leader for the parish of St. Theodore's, Taber. He is already assured of a large number of pupils here for both vocal and instrumental tuition.

PARTY LEADERS TO SPEAK IN ALBERTA

Ottawa, Sept. 19.—Senator Arthur Haydon, who is making arrangements for Premier W. L. Mackenzie King's speaking itinerary in the western provinces, states that tentative plans call for the ordering of the prime minister's western tour in Winnipeg on Monday, Sept. 28. This date, however, is subject to change.

Hon. Arthur Meighen, federal conservative leader, will be in Edmonton on Saturday, October 3, on his way to the coast. Arrangements are in progress for a mass meeting to be addressed by Mr. Meighen in the evening, at First Presbyterian church—Edmonton Journal.

The Women's Institute will hold their first regular meeting after vacation on Thursday, September 24, at 2 p.m. in the W. I. rooms.

RUSSIAN FAMILIES SETTLE IN CANADA

Edmonton, Sept. 19.—Five hundred families of Russian agriculturists in North China want to come to Alberta. Most of them can be classed as "intelligent," and they possess enough money to buy farms. Presumably Alberta wants them but they can't get in, for having been driven across Asia and over the borders of Manchuria by the Red Army, they are classed as "Asians."

The government immigration regulations state firmly that those who seek Canadian citizenship must arrive here by one continuous journey from the date of their birth, so the former soldiers of the Great White Bear tend their flocks and herds in Manchuria, and the mandarins collect the taxes instead of the Alberta government.

To ascertain conditions across the Pacific, Bishop Poshkowsky of Chicago travelled across the Pacific and will be in Edmonton within the next few days. Here the head of the Greek Orthodox church will endeavor to have the real tale bars lowered, and if successful will purchase farms for the Russian exiles.

A small party of these Russians came through from Manchuria, via Korea, Japan and Vancouver last week, 15 families settling west of Wetaskiwin, where they purchased 26 quarter sections from the Johnson Agencies.

TEN ADDITIONAL MEMBERS IN NEXT CANADIAN HOUSE

Ottawa, Sept. 19.—The next session of parliament—the 15th parliament—will see a larger representation in the house of commons than ever before in the history of Canada.

Under the redistribution act, officially called the Representation Act, 1924, there are 246 members, "ten more than in the last parliament. The act by taking away two members from Nova Scotia, 14 members now instead of 16, and raising the representation of Manitoba from 15 to 17, of Saskatchewan from 16 to 21, of Alberta from 12 to 16, and of British Columbia from 12 to 14, leaves Ontario, Quebec, Prince Edward Island, New Brunswick and the Yukon unaffected.

In the reallocation of seats among the provinces, and the total increase in the number of the constituents have been effected in the west. A summary of the alterations follows: Manitoba—Winnipeg Centre is replaced by Winnipeg North Centre, and Winnipeg South Centre, while St. Boniface is created a separate constituency.

Saskatchewan—Six new seats are created—Long Lake, Melville, Melfort, Rosetown, Willowbunch and Yorkton. The riding of Saltcoats is eliminated. Alberta—in the increase of four seats from Alberta the ridings of Victoria and Strathcona are done away with and new seats for Aquila, Athabasca, Camrose, Peace River, Vegreville and Wetaskiwin are created.

British Columbia—A new seat is created in Vancouver, Centre, North and South ridings now replacing the seats for Vancouver Centre and Vancouver South.

WOMAN FATALLY BURNED AT HOLDEN

Holden, Alta., Sept. 21.—Mrs. E. G. Ames, residing north of town, was fatally burned on Friday last as the result of her clothes catching fire. The late Mrs. Ames had been a cripple for over 20 years and she was following her usual custom of sitting before the fire when her clothing caught fire. Her daughter and the hired man were out milking and when they returned they found her in flames.

W.A. TEA AND SALE

The W.A. of United church held a most successful tea and sale of home cooking at the home of Mrs. R. W. Manley, on Saturday afternoon last. The rooms were artistically decorated with autumn flowers. Mrs. E. Barnett presided at the tea table, with Mrs. Compton and Mrs. Parker in charge of the sale table. The proceeds amounted to \$33.

GARDENS SUFFER

The heavy frost on Saturday night was disastrous to the beautiful gardens of Wetaskiwin which had withstood the weather. However, the weather has cleared up and the farmers have resumed threshing operations.

CLOSING BYLAW RECEIVES FIRST, SECOND READINGS

The regular meeting of the city council was held on Tuesday evening with all the members in attendance except Ald. Chandler.

After the adoption of the minutes of the last regular meeting, a letter was read from the Public Utilities Commission, approving the proposed mill rates for Wetaskiwin.

The Electrical Engineers, Ltd., of Calgary, wrote regarding the disposal of generator and other machinery. The matter was referred to the power house committee for report at next meeting.

SIXTH OF WHEAT FROM THE WEST ALREADY SHIPPED

Winnipeg, Sept. 19.—Up to noon, Friday, 62,267,262 bushels of wheat from the 1925 crop at country elevators had been marketed by the farmers of western Canada, according to official figures issued here. This compared with a total of 25,443,847 bushels at the same date last year, or an increase of over 150 per cent. Over the same period loadings have amounted to 47,575,000 bushels, as compared with 19,894,000 last year.

The following statistics have been gathered here:

Farmers since September 1st have poured grain into the elevators at the rate of 60 bushels for every tick of the clock over a 13-hour day. During the past ten days one car of wheat has moved east from Winnipeg every 23 seconds, 24 hours a day.

Cars used to date by the two railway systems total 33,081, which end to end would reach for 270 miles.

The Canadian Pacific railway alone has delivered enough grain at the head of the lakes since September 1st to load 200 ships with a cargo of 200,000 bushels each.

Saskatchewan has marketed \$385,000 bushels over the Canadian National lines, and leads the western provinces in the statistics of that railway. Alberta loaded 937,000 bushels on C.N.R. lines.

CAMROSE MAN SHOT WHILE OUT HUNTING

Camrose, Sept. 21.—A serious gun accident occurred on Saturday afternoon when twenty miles south of Camrose. Several young men had gone on a hunting trip and on reaching their destination the party had converted divided. One of the party in attempting to use his gun found that it had jammed and proceeded to take it apart, when in so doing the cartridge exploded.

Arthur E. Gray was standing fifteen or twenty feet away and received the charge in his left groin. He was rushed to St. Mary's hospital, Camrose, where he was found to be in a very serious condition, but there is hope of his recovery. Gray is a young married man who is well known in the community. At present his wife is visiting in England.

FLYING BULLETS VISIBLE TO EYE

Burning bullets shot at the rate of 2,000 a minute from four machine guns and plainly visible to the eye as they sped on their flaming path, provided a spectacle for staff officers and students who visited Sirocco camp Thursday afternoon to witness a demonstration of machine gun fire control, staged by the small arms school, under the command of Lieut.-Col. A. G. Turner, M.C. With tracer bullets, designed for fighters in the air force during the war and which makes it possible to see exactly where the shots are going, the small arms school gave practical exhibition of firing at a target hidden by a hill, firing at a target over the heads of advancing troops, firing with several guns at a concentrated point and a number of guns firing in parallel lines to cut up the ranks of advancing armies.

The demonstration was held in connection with the studies being followed by 35 candidates at the small arms school, who for the past few weeks have been devoting their attention to the rifle, bayonet, revolver, machine gun and the poisonous gases used in modern warfare. Despite the inclemency of the weather, the training has been proceeding almost without interruption and the camp will not be completely closed out until the middle of October—Calgary Herald.

house committee for report at next meeting.

A letter was read from the Kipp-Kelley, Ltd., respecting sale of generator.

Several communications from the Railway Board were read and filed. The magazine, Municipal Canada, wrote regarding free publicity to Wetaskiwin. The secretary will forward photographs and suitable paragraph for publication.

Secretary Fraser reported that he had prepaid a delinquent at the Imperial Bank and saved the city \$55.30. His action was ratified by council. The attorney general's department notified \$250,000, being liquor fines imposed by the police magistrate and justice of the peace of Wetaskiwin.

The city solicitor reported on the transfer of property to G. A. Morris, enclosing account for same. The account was passed for payment.

A party in Edmonton asked information regarding license for selling Christmas cards. He will be informed that the license for transient peddlers is \$50.00.

H. G. Smith asked for permit to enlarge his Variety store. This was granted.

A telegram from Mayor Taylor was read in connection with the calling of a conference of mayors for consideration of matters affecting B.C. and the prairie provinces. A reply will be sent approving of the meeting, and regretting that Mayor Montgomery will be unable to attend.

J. E. Fraser reported that he had seized goods at the Farmers' Cafe for taxes. His action was ratified and the matter referred to the finance committee to have goods advertised for sale.

R. D. Owens gave his health report following his inspection in August. The general conditions were very satisfactory, and the report was received and filed.

Accounts were passed for payment as follows: General, \$283.35; Water-works \$51.19; Electric light \$25.33; Supplementary \$181.67.

The directors of the Wetaskiwin Exhibition association requested a rebate of \$45.00 for electric light used at time of fair. This was granted.

The matter of fixing up the house of one of city's tenants, was referred to the public properties committee.

J. H. Matzloff offered to purchase a fire team for \$175.00 cash, delivery October 1. The offer was accepted. The matter of purchasing another horse or team was left with the public works committee.

The public works committee was instructed to fix up all plank sidewalks in the city at the earliest possible time.

The public properties committee reported the sale of ten acres in the northern part of city for \$200 to the Wetaskiwin Produce Co. The sale was confirmed.

The committee of the public properties committee in purchasing wire and posts for nuisance ground was ratified.

Bylaw No. 520, providing for the closing of the business places in Wetaskiwin on Wednesday afternoon during the months of June, July and August, was read the first and second times, and held over until a subsequent meeting for final passing. Meeting adjourned.

CRIMINAL COURT HERE NEXT WEEK

The regular fall sittings of the Supreme criminal court will be held at the court house here with Mr. Justice Boyle presiding, commencing on Monday morning next at ten o'clock. The following is a list of the cases to be tried, namely:

Rex vs Geo. H. Wildthong—Theft of horses.
Rex vs Reuben Smith—(2 cases), Indecent assault and carnal knowledge.
Rex vs Dan Knudt—Arson.
Rex vs W. O. O'Brien—Arson.
Rex vs William Michie—Selection under promise of marriage.
Rex vs Tows—Arson.
Rex vs Sterns and Tows—Theft of oats.
Rex vs William Simmons—Intimidation.
Rex vs R. Mandeth—False pretences.
Rex vs Bolton—Mischievous.

FIRE DANGERS IN THE HOME

There are several thousand fires in dwelling houses in the United States and Canada each year, many of them resulting in loss of life. Reasonable care on the part of householders would prevent a very large proportion of the losses and save the lives of hundreds of children annually. Practically every household is subject to one or more of these dangers.

Hundreds of children are burned to death each year. Safety matches that strike only on the box are the least dangerous, and these should be kept out of reach of small children.

Four thousand women are burned to death or scarred for life annually from the careless handling of inflammable liquids—when using coal oil to start fires, filling lamps after dark or when lighted, or cleaning floors or clothing with gasoline in rooms where there is a fire, lighted gas jet or exposed flame.

Don't put ashes in wooden boxes or barrels. A live coal may smolder unnoticed and destroy your home in the night.

Kindling and paper piled behind the kitchen stove are a source of danger. Don't start open hearth fires with great piles of loose paper.

Oil lamps and dust rags containing oil should never be shut in closets or hidden away in confined places. They may ignite from spontaneous combustion and cause a dangerous fire.

Don't light the winter fire until the chimney, pipes and all heating apparatus have been cleaned and put in perfect repair, and don't trust an open fireplace without a spark fender or screen. A fire from the heating arrangement usually breaks out at night and may cost the lives of women and children and destroy the house.

It is dangerous to tamper with electric wiring or fixtures. A great needless loss of life and property is caused by carelessness in lighting arrangements, electric wires, gas fixtures and oil lamps. Don't "doctor" fuses. In case of doubt, consult a reliable electrical contractor.

If an electric iron is forgotten it will become overheated and cause a fire. Shut it off when you leave it. Be sure that you buy only a first class apparatus.

W. C. T. U.

A rummage sale will be put on the first Saturday in October.

At our last meeting one of our members, Mrs. Carlson, gave an account of temperance conditions in her native land, Sweden, where she has visited during the last year. The government, now after the war, is making liquor traffic make generous provision for the instruction of youth in scientific temperance. While the geographical position of Sweden makes her a victim of the near war producing countries, and the wet propaganda is very active. Wine is served at the meals on ship-board. A party of music, consisting of 40 college graduates and students coming over to give concerts in America were very convivial, and true to form made jokes about prohibition conditions in the U.S. Some W.C.T.U. women returning as passengers thought a surprise awaited them when they landed.

Uncle Sam believes in the 18th amendment and starts on his fifth year water-gate journey, happy, prosperous and hopeful, saving \$74,000,000 per year, once again to relieve drink caused poverty. Instead of beer he buys bonds until one in five are security holders. Prohibition is a paying proposition.

OFFERS TO SELL NORTHERN ROAD

Edmonton, Sept. 18.—An informal proposal for the Canadian Pacific railway to purchase the E.R. & B.C. road on long-pay terms was made to E. W. Premier, president of the system, by the executive committee, which in turn followed a conference between Mr. Beatty and the government earlier in the day, when the entire situation was minutely canvassed. The new proposal represents the present plan of the government for further negotiations with the Canadian Pacific railway, its desire being to clear off the northern railway liability by disposing of its interests for a special price.

Mr. Beatty took the offer away with him and promised to give it consideration. If he does not accept the offer, the government will again fall back upon a choice between renewing the lease for operating the road and a scheme of government operation under the railway department.

Thanksgiving and Armistice Day will be celebrated on Monday, November 9th. It is customary now in Canada to observe the two celebrations on the Monday of the week in which falls November 11th. The anniversary of the signing of the Armistice.

10 YEARS ADDED TO HUMAN LIFE

MANKIND IS STEADILY WINNING IN GREAT-BATTLE AGAINST DISEASE

The average human life in many countries is now ten years longer than was the case fifty years ago. In fact, the Canadian, who said, "Cheer up, you'll soon be dead, a short life but a gay one!" can now change his song to "a long life and a gay one."

This lengthening of the average span of human life is a scientific fact. The chief cause of this increase in the average duration of human life is the reduction in the deaths of babies and young children. The danger of death from communicable diseases has decreased. Better baby feeding and maternal nursing have saved countless lives. The digestive troubles which kill babies were formerly so common as to be considered quite natural and almost inevitable. Gradually the truth spread that bad feeding was more dangerous to infants than was strong liquor to adults; that the nursing habit was a great menace to human life than the liquor bottle.

With the increased appreciation of the enormous value of breast feeding and the intelligent use of better methods of artificial feeding, the number of infant deaths has steadily declined so that in many communities less than half the former number of babies meet untimely and unnecessary death from incorrect feeding.

Decrease of Typhoid

The control of certain communicable diseases has done much to reduce the death rates. Smallpox is no longer an inevitable disease of childhood. It used to be considered a disease of childhood because nearly everyone caught it in childhood. The credit for this great change is due to vaccination, but vaccination protects only those who are vaccinated. At the present time so many people are vaccinated that smallpox is a steadily increasing menace. The neglect of vaccination is increasing the amount of smallpox each year. In Canada and the United States the number of cases of smallpox during 1924 was double the number for each of the two previous years.

Fifteen years ago it was usual for our general hospitals to have whole wards set aside for the treatment of typhoid fever patients solely. At the present time few cases originate in a community with pure supplies of water and sewage. Nearly all the cases of typhoid fever come from localities where sewage is allowed to pollute the water supply.

The decrease of typhoid fever in civilized countries is due to the provision of pure water and pure food. Every day more people realize that when typhoid fever is allowed to break out as an epidemic, someone should be held responsible. Under conditions of war, when pure water is not obtainable, safety from typhoid is given by typhoid inoculation together with the chlorination of water drawn for the troops. This was shown emphatically by the records of the Great War when fewer British soldiers caught typhoid fever than died of it during the South African war, despite the enormous difference in the size of the armies. In the South African war there was an average of 208,000 in the Great War an average of one and a quarter million men in the army.

The typhoid immunity of British troops in the great war was due to the provision of pure water and pure food. The typhoid death rate was lowered. But antitoxin is effective for only a few weeks. It checks the progress of the disease but it does not give lasting protection. Now comes a great triumph of medical science—the prevention of diphtheria. Where preventive treatment has been adopted there has been no more diphtheria. Preventive treatment for diphtheria stamps out this disease as surely and as thoroughly as vaccination against smallpox stamps out smallpox.

The saving of life during the past half century has not been shared equally by those in different age groups of the population. Even the great saving in the lives of babies has been largely a saving among babies over the age of one month. During the first month of infancy the risks are as great as ever they were. In-

provement will follow when mothers are given better care before birth and infants are given better care during the first month of life.

Healthful Middle Age

In persons beyond middle age the chronic diseases of the heart, blood vessels and kidneys still take a large toll. This increase in the death rate of advancing years is not in accordance with a natural law but is the result of causes which can be controlled. Of course people will not live indefinitely but science can do much to check the waste of vitality and especially the waste due to the increase of the chronic diseases so prominent in the death rate at middle life.

The reasonable way to attack these diseases lies in regular physical examinations, and in the practice of personal hygiene after the particular needs of the individuals have been ascertained.

Although the last half century has witnessed an increase of ten years in the average length of human life, there is good prospect that in the next half century an even greater increase will be obtained. Of the many untold fields of science none other gives greater promise of eclipsing in the future the achievements of the past.—R.G.

Abolishing Diphtheria

Not so many years ago diphtheria was a black enemy of childhood. All over the world it claimed a frightful toll. And the tragedy was that three-quarters of its victims were little tots under six—hardly more than babies. There was no sure way to combat it. Then came the antitoxin treatment and the diphtheria death rate was lowered. But antitoxin is effective for only a few weeks. It checks the progress of the disease but it does not give lasting protection. Now comes a great triumph of medical science—the prevention of diphtheria. Where preventive treatment has been adopted there has been no more diphtheria. Preventive treatment for diphtheria stamps out this disease as surely and as thoroughly as vaccination against smallpox stamps out smallpox.

The saving of life during the past half century has not been shared equally by those in different age groups of the population. FRUIT CULTIVATION ON PRAIRIE FARMS

The difficulties of growing fruit on the older cultivated prairies of the west are rapidly being overcome. The superintendent of the Morden, Manitoba, Dominion experimental station in his report for 1924 remarks that the interest shown in horticulture is increasing very rapidly and that there is a large demand for information thereupon, in fruit growing particularly. Many requests are received for scions and budsticks to work on native plums and cherries, plum cherries, and choke cherries, for seed for planting and especially for plums and hardy apples. The station at Morden, Manitoba, is largely devoted to horticulture.

Judging from the report 1923 was not altogether favorable for fruit raising, but we are told that the Siberian Crab, and its hardy hybrids seem to offer the safest roots for apple and crab apple varieties; that all types of currants had a good year; that gooseberries generally do well; that there was much winter injury in the raspberry patch; that Senator Dunlap and Dakota varieties of strawberries wintered well and produced fair crops; that the Champion variety of the ever-bearing strawberry produced generously over a long season, five and half quarts being picked on November 1; that the Waukegan plum attained good size, and that Champs and Tom Thumb are two low lying bushes of sand cherries of value in the back yard garden.

Relative to vegetables the report states that in a normal season a great variety can be grown with success in that part of the prairies where the station is situated.

THE CIGARETTE

"I am not much of a mathematician" said the cigarette, "but I can add to a boy's nervous troubles. I can subtract from his physical energy, I can divide his mental powers. I can take interest from his work, and discount his chances for success."

provement will follow when mothers are given better care before birth and infants are given better care during the first month of life.

Play the Game
And Play it Fair

This is the time of year when the vultures prey on the unsuspecting public, and in the flower terms, induce the unwary to part with their hard-earned money to the "benefit of the dealer."

The past few days one of these birds of passage has been soaring through our district "getting" grocery orders and no doubt the buyers are under the impression they are about to save considerable on their buying and they may save a little, but we doubt it. One of these orders was filled by an Altx merchant and at the regular price, which on a \$53 order, left the purchaser a balance to the good. One farmer-buyer has produced for sale but instead of leaving his dollar in Altx he could get it back for his goods, he sends it away and will expect the local man to pay him the other fellow's dollar. What good will the extra money do our district, or in fact our province, if we send it where it will not return? If you want your dollar to return you must keep it within travelling distance.

Again, take note that these birds do not bother you when you are hard up. No, they let the local merchant bear the brunt of your distress, so we cannot for the life of us understand why they should get the cream—Altx Free Press.

Railways, Government,
Make Agreement to
Stimulate Immigration

Edmonton, Sept. 15.—Addressing a large gathering at a dinner given him by the board of trade here last night, E. W. Beatty, chairman and president of the Canadian Pacific, announced a new arrangement entered into between the Canadian railways and the government, by which, he said, it was hoped to very materially stimulate the movement of desirable immigrants to Canada.

Under this agreement the two railway companies, through their colonization departments, have been given a free hand to select, transport and distribute all colonists who can be properly assimilated in Canada, with the further privilege of having the necessary permits for their admission subject to the requirements of the statute and to the mental and physical fitness of the applicant.

"As a result of this agreement," said Mr. Beatty, "we may be able in view of the favorable harvest conditions existing in the west, to look forward to a renewal of the movement of those who are urgently needed in solving the serious problems we are now faced with in Canada."

Mr. Beatty had been asked to speak on immigration and he said he would have less hesitation in so doing were it not, notwithstanding the general acceptance throughout Canada of its necessity, progress in recent years had been disappointingly slow, though it was hard to understand how there could be any difference of opinion, or any reasonable ground for opposition to a policy of intensive immigration.

Mr. Beatty said Canada had the justification for such a policy in undoubted needs and heavy national burdens which could only be relieved by greater production and also had the support of two precedents, namely, our own experience in the early part of the century, and the experience of the United States, the progress of that great republic having begun and sustained by reason of the influx of people in great numbers who were willing to open up their new territories and by their individual effort, contribute to the country's prosperity.

Since the beginning of the war, Canada had to limp along with a reserve man power, and until the man power was pumped in again on the old scale, our activities must be curtailed and our progress slow. This condition was not confined to western Canada. Nova Scotia and New Brunswick needed additional population and had good farm land available, and their people believed they had been side-tracked by the booming of the west, as a location for settlers. Northern Ontario wanted more people to fill it up and I think you can rest assured, said Mr. Beatty, "that the country there will never be opened up until the motto of colonizing Canada is changed."

Mr. Beatty pointed out there was nothing that would hold Canadianians in

Canada and invite others so much or so effectively as national producers. Profitable production and effective distribution would solve our principal national problem. The two transportation companies recognized that only by increased production could the problems of national debt, excessive railway mileage and need for further industrial development be solved and this fact was borne in upon those on whom the responsibility rests by the disappointing results of this year's efforts. It appears certain that the volume of immigration will this year not exceed 60 per cent of that of last year.

Mr. Beatty concluded with an expression of complete confidence and faith in the future of Canada, which, he said, was a great deal of all Canadian Pacific contributions to the development of the Dominion, because it seemed to him that confidence and faith was what Canadianians most of all needed today. After-war depression had led to talk of people losing hope, to talk of disintegration, of provinces threatening to secede, of the possibility of Canada casting her lot with the great country to the south. But there was no institution in Canada which had not lost confidence, which still had faith in the future of the Dominion, which still believed that the one and only salvation of this country was to remain an undivided whole, with its present imperial ties, and that institution was the Canadian Pacific Railway.

ENGLISH ADVERTISING
IS \$140 TO \$420 AN INCH
HIGH RATES ANZE AMERICAN
BUSINESS MEN — BUT IT
BRINGS RESULTS

American advertisers and business men who attended the Wembley convention of the Advertising Clubs of the World, as well as American visitors in general, are amazed to learn that English stores pay from \$140 to \$420 an inch for advertising. These are the highest advertising rates in the world for newspaper space, but when one learns of the huge circulation of English newspapers it is little wonder that even at such rates advertising is profitable to the English merchant, says the Duluth Herald.

Among things discovered by American visitors is that Christmas space must be bought fully a year in advance to insure insertion. Matters connected with British retail business that were brought to the attention of American advertisers are of interest to all.

Merchandising in its relation to advertising was given considerable attention by the convention, and the views and experiences of some of the leaders of retail enterprise provided Americans with a number of worthwhile pointers.

For instance, American merchants who visit London get an idea how much more costly is newspaper advertising than in their own country.

They figure that the merchant in England who can afford to buy space at the rate of \$150 a column inch, or nearly \$10 per square inch (which is the rate of one daily newspaper in London with a certified net circulation of 1,700,000 daily) is surely doing a big business. The retail merchants of London who use this newspaper for advertising have to pay \$30,000 for a single front page advertisement, and for space at Christmas time have to book up a year in advance.

The English merchants say that their experience proves that newspaper advertising brings by far the best results for all kinds of goods from bottled shrimp paste to carpets. But it is advertising that they have to pay heavily for. Many American delegates and merchants were astonished to hear that one English newspaper with a fifty-four inch page size \$20,000 a page, or around \$475 per single-column inch, or \$50 per square inch.

CALGARY HIGH JUMPER
BROKE WORLD'S RECORD

New Westminster, Sept. 14.—Barra Lad, the great high jumping horse owned by Welsh Brothers, of Calgary, established a new world's high jump record at the provincial exhibition at New Westminster, on Saturday night, when he cleared the bar at a height of eight feet one and a half inches, under a perfect ride by 16-year-old Lewis Welsh. The horse made a beautiful jump but in his descent he stumbled and fell heavily, throwing his young rider, but not injuring him. Barra Lad died last night from concussion. His hind quarters were paralyzed by the fall.

TO ELIMINATE BETTING
Elimination of betting from all horse races in the province was the aim of a resolution passed by the British Merchants' association in convention at Winnipeg. The adoption of the resolution followed a lengthy discussion of the racing question.

Alberta Will Require Twine
To Encircle World 79 Times

Speaking of distances, here's one to puzzle the most acute mentality in Alberta or in the whole Dominion for that matter.

Alberta this year will require 1,979,135 miles of binder twine, to harvest its crop.

In other words, twine enough will be needed in this province alone to encircle the earth more than 79 times. That will give some idea of the magnitude of Alberta's crop this year.

The amount of twine indicated as necessary for the binding of the Alberta crop represents an increase of no less than 60 per cent over last year's requirements. And that will pretty nearly represent the increase in the 1925 yield in Alberta over the 1924 yield, if the amount of twine used is any indication of what the harvest will be.

In addition to predicting a three-fifths increase in the volume of the crop as ascertained by the demand for binder twine, local dealers in harvesting supplies state that there is a vast difference from that year in the way in which twine will be spread over the province.

"It will be a great deal more evenly spread over the entire province," one official stated to the Albertan. "Last year the fact was quite noticeable that larger quantities of twine were required in spots, while smaller quantities were required in others. In some places two pounds to the acre was needed, while in others as high as six pounds were used."

An average requirement of 2½ pounds of binder twine per acre of crop would be a very fair figure in Alberta, that is for the entire province. In the districts where the yield is largest, more than that amount of twine is needed, whereas on the other hand in the southern parts twine was hardly a necessity this year.

Twine dealers report that the demand for twine in southern Alberta has been very restricted, and over a large area the use of heading machines only was required, so light were the straw and heads of the grain.

Binder twine goes about 550 feet to the pound; 2½ pounds are needed per acre; there are something like 5,600,000 acres in wheat and nearly 2,000,000 acres in oats this year in the province. The net result is that 1375 feet will be required for every acre, 1,979,135 miles for the province, which will encircle the earth over 79 times.

It will be a real problem to supply all the binder twine used in the province this year, and will keep large factories working overtime and employing hundreds of men to meet the need of the farmers of Alberta.

New York, Sept. 17.—Cooking an egg on a cake of ice by wireless was one of several demonstrations of mysterious radio power given yesterday at the radio world's fair.

The egg was placed in a frying pan on the ice. In a moment the pan became red hot but through the action of the waves that penetrated the ice. The egg was soon cooked to a turn. The trick was done through the so-called wireless lamp, the inventor of which also lit the bulb through a man's head.

Here and There

The first batch of last winter's furs brought from the Far North by the steamer "Distributer," from Alaskavik, has arrived at Edmonton, Alta., and is valued at approximately \$1,000,000. Good catches of furs were reported throughout the north.

Sockeye salmon fishing around Vancouver, B.C., for the first three weeks of the current season, while not as active as last year, has, so far, resulted in fairly good catches. The latest reports indicate a catch to date of 55,000 cases, which is 2,900 cases less than last year.

While the members of Dean Sinclair Laird's party of school teachers from Ontario is returning East from their tour of the country the party of British teachers, who landed in Canada recently, is now travelling through the West on a special Canadian Pacific train to gain knowledge of the country and information concerning its resources.

Construction of the half million dollar storage and power dam on the Muskoh River, authorized at its last session by the Ontario Legislature, has been commenced. The proposed work is designed to control the flow from the Muskoh Lakes basin and will enable the linking up of power development in that district with the Eugenia-Severn system.

Passenger traffic over Western Lines of the Canadian Pacific Railway to date this summer has been particularly heavy, and a large number of special trains and special cars being operated for British, Canadian and American tourists. Lake side and summer tourist travel to the annual exhibition at Saskatoon and other Western points required the operation of special trains.

Construction of one of the largest and most modern departmental stores at Winnipeg, Man., by the Hudson's Bay Company will be proceeded with immediately, according to an announcement by Mayor Webb of that city. A start upon the company's building programme here was assured, stated Mayor Webb, with the passing of a by-law by the City Council providing for a memorial boulevard flanking the Hudson's Bay property.

During the first half of August two important Ontario railway towns celebrated their Old Home Week and held pageants illustrative of their local histories and industrial activities. These were North Bay and Smith's Falls, both of which held C.P.R. Days and were the meeting points for thousands of railroad men, who assisted in the pioneering work of the districts. The Old Home Week at North Bay marked the graduation of that town to full-fledged cityhood.

The funeral in Montreal recently of the late G. M. Beavorth, chairman Canadian Pacific Steamships, was attended by E. W. Beatty, chairman and president of the Canadian Pacific Railway, and nearly all the directors and executive officers of the company. An impressive and dignified procession followed the ceremony, a cortège being formed by the Company's police and officers and men from the crews of Canadian Pacific steamships.

A party of thirty prominent American society people, scientists and artists succeeded recently in blazing a new passage along the Wolverine pass across the northern Canadian Pacific Rockies with the Trail Riders of the Canadian Rockies. The riders this year have many famous men among them and six separate countries are represented. Twenty of the members wear gold and enamel buttons, showing that they have ridden 2,500 miles along the mountain trail.

The Torture of
ECZEMA
or SALT RHEUM

Eczeema, or Salt Rheum, as it is commonly called, is one of the most agonizing of all skin diseases. The intense itching, swelling and smarting, especially at night, or when exposed to heat, makes it almost unbearable and relief is quickly welcomed. There is no remedy like

for giving relief to such suffering no remedy that has done, or can do, more for those who are almost driven to distraction with the terrible torture of eczeema. Manufactured only by The T. M. Bux Co., Limited, Toronto, Ont.

LAWBREAKERS

His breath suggested bootleg booze, and when he talked in moral strains

of sinful men, of those who choose to make the statutes seen in vain, of murderers who ply the dirk, the poisoned lemon and the gun, somehow his logic failed to work. It made no hit with any one. He was a man of high estate; his fame had gone the whole world round, his eloquence was truly great, his knowledge varied and profound; and from his kelly to his shoes he seemed like fashion's well known glass; but he was scented up with booze, and what he said cut little grass. He talked of how the bandits steal, in daylight, money from the banks, of how the red assassins reel through city streets in gory ranks; of gambling in the slums and stews, of phony coin the shavers pass, but he was all lit up with booze, and what he said cut little grass. For he preaches of the law should be remote from sordid sin; no useful morals can he draw, if he is full of Gordon gin. The crimes of others he deplores his text the durid scorching news and then, behind his guarded doors he takes three shots of bootleg booze. When Satan's found rebuking sin, he may employ well chosen words, but

all his hearers broadly grin, and throw his counsel to the birds. Too many moralists there are who hand us maxims cold and raw, and then consult the old brown jar, in calm defiance of the law.—Walt Mason.

Young Tender Leaves
and tips used in"SALADA"
GREEN TEA

are sealed in air-tight aluminum foil. Their fresh flavor is finer than any Japan or Gunpowder. Try SALADA.

Over and Above
them All

True to its heritage—a superb quality none but Old Crow can supply. Every drop a dividend of delight.

This advertisement is not published or displayed by the Liquor Control Board or the Government of Alberta.

Advertisers, Attention!

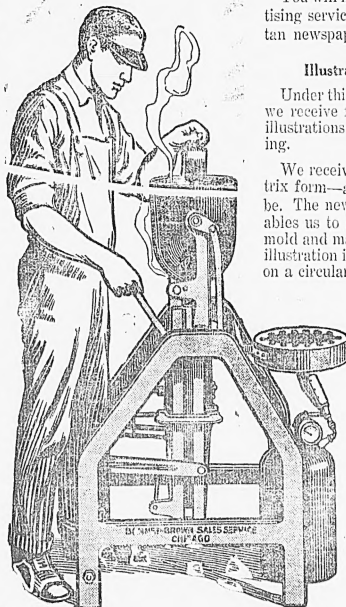

The Wetaskiwin Times has just installed the Bonnet-Brown Advertising Mat Service, and Stereotyping Machine

You will now receive the same advertising service that the large metropolitan newspapers give their advertisers.

Illustrations that Help Sell

Under this splendid new service plan we receive fresh each month, ads and illustrations for every kind of advertising.

We receive these illustrations in matrix form—a paper mold of the cut-to-be. The new stereotyping machine enables us to pour hot metal into this mold and make a plate for printing the illustration in the Wetaskiwin Times or on a circular.

Advertisers who receive matrices of their merchandise from their manufacturers or wholesalers can bring them to us and we will make cuts for use in their advertising. This service, we are confident, will result in greatly increased business for every advertiser who takes advantage of it.

And you can put your message across in a concise, easily understood manner that will be pleasing to readers of the Wetaskiwin Times and most satisfactory to you in the greater results obtained.

Advertising Service for Every Business

And, in addition to being able to supply you with suitable cuts for illustrating your ads, we are prepared to furnish advertisements covering every line of business.

These ads have been written by competent advertising experts—and are so planned and executed that

they execute the maximum amount of pulling power possible in the space used.

So, when you want to run an ad, instead of spending time to write it yourself, come in and let us help you. We'll give you one that fits your needs—illustration and all.

ACKNOWLEDGEMENT
In our issue of September 23rd we published one of Herbert Kohlberg's very interesting stories entitled "Bulldogging a Ranch Cow." This story originally appeared in "The Youth's Companion," and in the rush of publication we omitted to state the source of the article.

CARD OF THANKS
Mrs. James Silver and family wish through the columns of The Times to thank their many friends and neighbors for the kindness and sympathy shown during their recent bereavement, also for the beautiful floral offerings.

Ten Thousand Alberta Farmers

with

One Million acres of Wheat

Are now ready to Join the Alberta Wheat Pool.

A Commission of \$1.50 per Contract will be paid on all bona fide Contracts sent to the Head Office.

BETWEEN SEPTEMBER 28 and DECEMBER 31

The Campaign is open to the public and a commission will be paid to all canvassers except members of the Board of Directors and Employees of the Pool.

Delegates and Local Secretaries are eligible to canvass and receive commission.

CONDITIONS OF CAMPAIGN

- (1) All Contracts sent a must be complete as to signature of the grower, his Post Office address, land location, etc. If the grower's name is not clearly written, print it.
- (2) A Canvasser's report properly filled in must accompany each parcel of Contracts. This will show to whom the Commission should be paid.
- (3) Where the membership fee of \$2.00 is paid in cash by the signer, the canvasser may remit \$1.50 to Head Office and retain the balance as his Commission.
- (4) Where the grower signs the note for \$2.00, the canvasser should see that the signature is properly witnessed. A commission of \$1.50 will be mailed to the canvasser's address as shown on the canvasser's report accompanying the contract.
- (5) Contract forms, Canvasser's Report forms, and self addressed envelopes, are being sent to all Wheat Pool Secretaries, Wheat Pool Delegates, U.P.A. Secretaries, and Secretaries of Municipal Districts, or you can write to Head Office for supplies.

INCREASE YOUR SELLING STRENGTH BY AN ADDITIONAL TEN MILLION BUSHELS IN THIS YEAR'S POOL.

BOARD OF DIRECTORS,
Alberta Cooperative Wheat Producers Limited,
Calgary.

TOWN TOPICS

Miss Marion McDonald, of Dauphin, Man., is visiting at the home of Mr. and Mrs. A. H. Brink, for a few days.

Mr. and Mrs. J. F. Ellis and daughter Reta, spent the week-end in Edmonton visiting Mr. and Mrs. Earl Garlough.

The Rehoboth and Old Fellows are holding a court whist social evening on Wednesday of next week in their lodge rooms.

Mrs. A. L. Elliott went to Edmonton Wednesday to attend a meeting of the Women's Missionary Society of the United Church.

Rev. A. L. Elliott went to Calgary Monday to attend a meeting to deal with the matter of home missions of the United Church.

Mr. and Mrs. A. E. Wynne were in Edmonton several days of the past week visiting friends and looking after some business affairs.

A. W. Lillidahl of the New Sweden district went to Edmonton on Tuesday for medical consultation and he may undergo an operation while there.

Mrs. Barnhill, who has been spending the summer visiting relatives and renewing old acquaintances in Nova Scotia, returned home on Monday evening.

The many friends of E. Barnett, court reporter, will be glad to learn that he has decided not to move his family to Red Deer as announced in a previous issue.

Mrs. McDonald, who has been visiting her mother, Mrs. J. H. Hall, and other friends, left on Saturday's train for her home at Cranbrook, B.C. She was accompanied by the children.

Mrs. J. I. Poole, of Wetaskiwin, was a guest on Friday at the home of Mrs. C. B. Richmond. Mrs. Poole was returning from Strone where she had been addressing a W.C.T.U. conference.—Daysland Press.

The winter schedule of the C.P.R. train goes into effect on Sunday next. There is little change likely as Wetaskiwin is concerned. Attention is directed to the fact elsewhere giving the times of trains here.

The normal schools of the province opened on Tuesday. Among the Wetaskiwin students who left Monday evening to attend the Camrose school were Ben Farnham, Jean Robinson, Dorothy Reist, and Mamie Smithson.

A most enjoyable time was spent in the Masonic lodge room on Thursday evening last when a degree team from Strathcona paid an official visit and conferred a degree. R. W. Bro. Robinson, D.D.G.M., and other grand lodge officers were also present.

Mr. Murray of the City Bakery is making extensive improvements to the bakery by having one of the old ovens removed and a new modern oven erected in its place. When this work is completed he will have one of the best plants outside of the large cities in Alberta.

A chicken supper will be held in the Salvation Army Hall on September 25th. Admission 50c. Staff Captain Caruthers will preside and speak a few words. The annual sale of vegetables, chickens, eggs, fruit, etc. will be held in the hall on Monday, September 28th.

The school board is having a cement and cinder walk put in around the Alexandra school. During the vacation, a concrete walk was put down in front of the King Edward school. These walks make a great improvement to the appearance of the school grounds.

A party of about twenty-five Russian families arrived in the city last week, and they have taken up their residence in the curling rink until such time as they can be located on the land they have purchased in the Pease Lake district. Several of the children have been enrolled in the primary department of the Alexandra school.

DR. McQUEEN SPEAKS HERE

On Sunday last the Presbyterians of Wetaskiwin received a real spiritual treat at their morning and evening services conducted by Rev. Dr. H. G. McQueen, D.D., of Edmonton. The Dr. is among the pioneers of Presbyterianism in Alberta, as his missionary and pastoral work in the province has extended continuously since 1887. The choir, too, contributed its part towards making the musical part of the services truly inspiring and its renderings were much appreciated by the assembled congregations, especially the solos of Mrs. Walter Groves in the morning, and those of Mrs. Chas. Boyer and Mr. Hewitt in the evening. The Rev. Dr. was the guest of Mr. and Mrs. J. I. Poole during his stay in the city.

LACOMBE PRESBYTERY

The opening meeting of the Presbytery of Lacombe was held at Lacombe on September 17 and 18. At most a full representation of ministers and laymen were present. Rev. R. R. Layton, D.D., minister of St. Andrew's church, Lacombe, was unanimously elected chairman and Rev. J. B. Francis of Ponoka, secretary in the same hearty manner.

A communion service, presided over by Dr. Miller, in a most dignified and solemn manner, marked the opening of the session and seemed in a very realistic manner to bring the Divine Presence into our midst.

The most beautiful spirit of fellowship and harmony prevailed throughout the entire Presbytery meeting. After the opening service of worship the Presbytery adjourned to meet in denominational sections at which all unfinished business was completed, and everything set in order to pass on to the United Presbytery.

The United Presbytery was addressed

by Rev. Dr. Miller, Rev. Powell and Rev. Wilson. These men making the official circle of Alberta presbyteries, had the business well in mind and so helped considerably in the first meeting.

The departmental committees were appointed with convenors as follows: Maintenance and Extension—Rev. T. F. Finlay of Oliver.
Missions, Social Service and Evangelism—Rev. A. L. Elliott, of Wetaskiwin.
Religious Education—Rev. Law, of Rimney.
Life Service—Rev. Francis of Ponoka.

All the members of the presbytery felt keenly that the hope of the church depends on personal consecration, a deepening of the spiritual life and transmitting to the people the facts of our church and a vision of her task. Surely the Presbytery of Lacombe was deeply moved by the Divine Spirit and each member returns to his charge feeling keenly the weight of responsibility.

SHERIFF'S SALE of FARM PROPERTY

There will be sold by the Sheriff of the Judicial District of Wetaskiwin, at the Court House, Wetaskiwin, on SATURDAY, the 26th DAY OF SEPTEMBER, 1925, at 2 p.m., the following lands:
 The North-West Quarter of Section 4, Township 46, Range 27, West of the 4th Meridian, containing 160 acres more or less, reserving there out all mines and minerals.
 The Vendor is informed that the improvements on this property consist of a well, 12 acres of breaking and a wire fence surrounding the property. The timber has been cut off and the remaining area can be very easily cleared. The soil is a good, dark, sandy loam. The property is situated approximately 25 miles west of Wetaskiwin, one mile south of the main graded Pigeon Lake Trail and 12 miles from the Blind Man Valley Railway through Honey.
 This property will be offered for sale subject to an upset price of \$1,200.00 and subject to taxes subsequent to the 31st day of December, 1924.
 The terms and conditions are as follows: The purchaser is at the time of the sale to pay down a deposit of ten per cent of the amount of the purchase price to the Vendor's Solicitors and the balance of the purchase price is to be paid in to the Supreme Court at Edmonton within sixty days from the date of sale without interest. In all other respects the terms and conditions of sale will be the standing conditions of the Supreme Court.
 For further particulars as to terms and conditions apply to The Sheriff at Wetaskiwin, or to Van Allen, Simpson & Company, Empire Building, Edmonton, Solicitors for the Vendor.
 DATED at Edmonton this 5th day of July, A.D. 1925.
 J. I. POOLE,
 Acting Sheriff,
 Wetaskiwin
 Approved:
 "A. Y. B."

SOLILOQUIES OF THREE ASPIRANTS

The names of Dr. R. D. Robertson and Dr. T. B. Stevenson are being prominently mentioned in connection with the Liberal Convention shortly to be held and we have it on good authority that Mr. C. H. Russell, well known barrister of this city, is being urged to allow his name to be put forward at the Conservative convention to be held on Thursday of this week.

(Dr. R. is sitting back in his swivel chair, musing after a hard day's work)
 "This life begins to bore me;
 I have had enough
 Of cases, operations, tapping chests,
 Clinical thermometers and what not.
 The word 'appendix' doth affright me.
 Last night I dreamed, and on my bed
 Danced four and twenty appendices,
 All in a row.
 And they mocked me, jeered at me.
 I am undone.
 I will break these bonds, and lo!
 Into the political fray I hurl myself
 Inconsiderable weight.
 The Liberal banner will uphold,
 And guide this fair Dominion to its
 Rightful destiny.
 But stay! I must not be too hasty;
 I must be sure before the gauntlet
 I throw down.
 But then 'twas heart ne'er won fair
 Lady!"

I will decide this night."
 (Telephone rings)
 "Yes. Yes. Who's speaking? Yes.
 Pain in right side. Sharp pain? Vomiting.
 Alan. Clearly appendicitis. Bring her
 in in the morning."
 (Hangs up receiver)
 "This cursed appendix doth dog my
 steps.
 There is no rest for me but
 in Ottawa."

(Dr. S. sitting enjoying a well-earned cigar. The hour is late; the house is quiet. The doctor has been dozing, and there appears a ghostly shape.)
 "Ah! Who cometh my quiet to disturb?
 Great Scott! 'Tis no other than my
 right-hand cousin,
 The Right Honourable George P. I.
 He speaks.
 I listen."
 The Ghost—
 "Arise, my cousin Tommy, and put on
 Thine armor bright, gird up thy loins,
 Join the merry throng. Get in the
 game,
 And be as I.
 A Minister of State.
 Quit this sorry game,
 Bid goodbye to plasters, squibs and
 pills,
 And hark! Pay attention! Hast ever
 thought
 What a team that thou and I, fair
 cousin,
 Wouldst make, in yonder Capital?"
 (Ghost vanishes)
 "Did I hear aright?
 This must be he sign,
 A portent straight from heaven,
 To bid me emulate dear George P.
 Ah, me! It would be nice,
 The Right Honourable T. B. Stevenson,
 Ottawa, Wetaskiwin and Ma-Me-O.
 It doth allure me."

(Telephone rings)
 "Yes. Yes. Severe vomiting.
 A dose of castor oil immediately.
 Bring her in tomorrow.
 I fear appendicitis."
 (Hangs up receiver)
 "Now I wonder if the right course I
 pursue,
 To give up this game
 There is good money in it.
 But then—The Right Honourable!
 To be like George P.—
 I will consult my spouse
 And tomorrow will decide."

(C.H. in his office, late at night, preparing sheaves of motions to launch at the head of an inoffensive judge.)
 Oh, Lord my sainted Aunt, I am fed up
 This work begins to get upon my
 nerves,
 It gets my hally goat, or words to
 that effect.
 Gadzoos! I would the whole ca-
 bonic
 Vore at the bottom of the sea.
 Methinks I will listen to this urge
 That bids me take this nomination,
 And fresh fields and pastures new
 Explore, and lead this brightened land
 Into the Conservative fold.
 And yet! and yet! It will be hard to
 sever
 The ties that bind me to this daily
 round;
 For after all it has its compensations,
 The legal fight that sharpens all one's
 wits,
 The point so neatly taken,
 The rolling on's opponent in the dust,
 All this doth please me mightily.
 To say goodbye to Chet,
 And leave the genial Mick,
 And the circuit off so jolly
 With merry quip and company most
 It fills me with regret to say goodbye
 to these.
 But then! What would you,
 To tread the Halls of Fame,
 One must be prepared for sacrifice.

But stay! There is one thing
 That gives me pause.
 Should I this venture take, a single
 man,
 No wife to cheer me on;
 No hairs to clap their hands at Dad's
 success?"

(Telephone rings)
 "Yes, yes—Russell speaking—yes.
 Divorce, you say. Alimony. You
 say you have a good defence. Well,
 come and see me tomorrow. Goodbye."
 (hangs up).
 And so they come, well well,
 This double harness question makes
 one think.
 Begone all doubt and troublous ques-
 tionings,
 Into this fray I'll hurl myself,
 And show them that I'm fit to take my
 place
 With all the best of 'em.
 And now (rings) I will to bed and
 by-by go.
 And dream of victory sweet, and per-
 chance
 Who knows, one day a Judgeship may
 be mine."

1925 FALL MILLINERY OPENING 1925

OLD KENTUCKY

BOURBON WHISKEY

UNDER FEDERAL GOVERNMENT SUPERVISION

Honorable names are your surest guide to quality. For countless years the name "Old Kentucky" has been the hallmark of supreme quality in bourbon whisky.

This advertisement is not published or displayed by the Liquor Control Board or the Government of Alberta.

WESTBOUND RATE REDUCTIONS ARE DISAPPOINTMENT

Alberta is still at a loss to understand the exact meaning of the new freight rates on grain and flour for export moving westward to Vancouver which went into effect Wednesday of last week in compliance with the order of the board of railway commissioners, which was supposed to have ensured "equalization" with rates eastward.

With the receipt on Wednesday by the local offices of the Canadian National and Canadian Pacific railways, of the new tariff schedules, this astounding fact was ascertained: At a number of points throughout the province the rate to Vancouver is actually larger than it was previously to September 15; at many other points there has been absolutely no change in rates; and at the remaining points the reduction has been so slight that it is almost negligible.

Mr. Tunis, chairman of the railway committee of the Calgary board of trade, believes that the mountain differential of 18 per cent is still operative.

At a conference on Wednesday at Edmonton between Attorney General Cross of Saskatchewan, Attorney General Brownlee of Alberta, and S. B. Woods, K.C., it was agreed that Mr. Woods should represent both provinces in opposing any attempt to have the railway board rescind its recent decision to reduce coast rates.

Following is a comparative list of the old and new rates from the principle centres on the prairie to Vancouver:

Saskatoon	old	new
Regina	25 1/2	27
Moose Jaw	25 1/2	26
Swift Current	25	24
Edmonton	22 1/2	21
Lebbridge	23 1/2	23
Medicine Hat	24 1/2	23
Calgary	22 1/2	21

SHORT COURSE AT THE AGRICULTURAL SCHOOL

The Olds school of agriculture offers a scholarship of \$125.00 to the girl student attaining highest standing at the short course to be held at the O. S. A.

The short course for the candidates is to be held between the dates of Tuesday, October 6th and 9th. Each Institute and U.F.W.A. in central Alberta is given the opportunity to send one representative to this course. It is asked that each organization select their own representative, the only conditions attached is that the girls shall be sixteen years of age or over, be a resident of a farm and have not had more than one year of high school education. It is also asked that each organization sending a representative pay the transportation of their candidate to and from Olds, and meet the small expense incurred for living expenses while she attends the course.

The Doctor Knows

Dr. J. A. King, of St. John's, Que., writes: "I have frequently used Minard's Liniment and also prescribe it for my patients always with the most profitable results, and I consider it the best all-around liniment."

G. A. King, M.D. also recommends Minard's in the following words: "I have used Minard's Liniment myself as well as prescribed it in my practice when a liniment was required, and have never failed to get the desired effect."

Every Community Should Be Ensured of Good Milk

(Prepared by Can. Medical Assoc.) Points covered in former articles on milk have shown:

1. That milk is a chemical product composed of water, fats, protein, sugar, various ferments and salts, in the most perfect food formula in the world.

2. That bacteria, dirt or other impurities to which milk may be subjected, are fruitful sources of diseases which may be milk borne.

3. That "dirty" milk has come to be regarded as a frequent cause of typhoid fever, tuberculosis, summer complaint of infants, and scarlet fever, or other infectious diseases.

4. That disease germs in milk may be derived straight from the cow or may be conveyed to milk through infected handlers and that man is the more common source.

5. That in order to prevent the contamination of milk, every possible avenue of infection from the cow to the consumer must be watched and the milk kept cold.

6. That sanitary inspection of all dairies, animals, handlers and of all local water supplies, is indispensable to safe production of good milk.

7. That protection thus offered by public health measures and officials against the dangers which may threaten your young children or household from infected or carelessly handled milk, unless known to be of the most thorough and scientific kind, should not be relied on to ensure safe milk. For this reason there must be especial care of milk in the home and additional sterilization by pasteurization or boiling of (at least) all milk fed to babies or young children.

In this final article on milk, we wish to stress two points:

1. Everybody should see to it, no matter where he or she lives, that milk in your community comes from healthy cows, is properly handled, and is safe, good milk.

2. Everybody having made certain of this in a comprehensive, intelligent way, should then proceed to eat plenty of milk.

Some folk don't like milk, and many think that it doesn't matter whether they drink milk or get a sufficient supply of milk products in their daily food or not. Some people do not even feed this perfect food to their children once infancy is past. Yet look at the results of milk diet. Human beings exclusively milk fed in infancy, grow proportionately faster than they ever do again. A baby who fails to double his weight in six months, and trouble it in twelve, has some thing the matter with him. He does it on milk alone.

Then although pigs are pigs, and humans, humans, experiments on porkers are equally convincing. Two piglets from the same litter were reared exactly the same ration except that number two got no milk after he was weaned. Numbers one and two were treated otherwise exactly alike, and both had all the food they could gobble. See what happened.

At the end of an allotted time piglet number one had grown to forty-two pounds three ounces, while on the same day piglet number two was only thirteen pounds five ounces. The milk-fed pig increased more than three times as fast as the one which had no milk.

Experiments in the feeding of undernourished children with a daily ration of milk, in many of our Canadian towns and cities, have not been less convincing as to the almost miraculous food values of milk.

In Toronto, Winnipeg, Montreal, Vancouver and many other cities and towns, philanthropic bodies supply a daily ration of milk for many of the ill-developed, underprivileged children in our schools in poor districts. In all cases this is attended with the usual magnificent results, though it is a sad fact that many of the children have been taught to drink and enjoy milk. They have had so little of it since babyhood, and

The Preparation of The Young Sow for Breeding

The young sow should be ready for breeding at eight or nine months of age. The ideal condition for breeding is to have her well grown for her age, thrifty, not too fat (i.e. not fat enough for market) and thriving and putting on weight at the time she is bred. A good practice to follow is to allow the young sows and barrows to run together up to four and a half to five months of age, at which time the best young sows should be selected for breeding and the remainder finished for market. The sows for breeding should be kept on pasture with a meal ration made up of two-thirds oats and one-third barley, with 5 per cent tankage added, which will promote growth rather than the laying on of fat. A rape pasture with a limited grain allowance in the late fall is excellent for flushing the young sows and putting them in good condition physically.

If the breeder has facilities for raising for early litters, the ideal time for breeding would be while the sows are on this rape pasture, or just as they go into winter quarters. If the breeding must be delayed until December, a more liberal grain ration should be fed to keep the sows growing well after the pasture is done and while the weather is cold. The proportion of oats to barley will depend upon the condition of the sows, that is, if they have a tendency to become too fat not more than one-third of the ration should be barley. It is well to continue the five per cent of tankage as it will promote the growth of bone and muscle. Plenty of exercise for the young sows both before and after breeding is extremely important. Exercise may be forced by having the sleeping quarters some distance from the feed trough. If the ground is covered with snow it is advisable to keep soft coal before the young sows. — Experimental Farm note.

Winnipeg, Sept. 18.—A closed season for prairie chicken, partridge and grouse, has been proclaimed in Manitoba, by orders in council passed yesterday, on the recommendations of the provincial cabinet. Scarcity of this variety of wild fowl was given as the reason for the order.

they do not recognize it as a desirable article of food. Nor is it only our poor children who suffer from a lack of milk taken daily. Surveys of school children in several of our cities have disclosed a great amount of undernourishment in the children in schools of rich or prosperous districts, and it has been established that few, if any, of such children are given a daily ration of milk.

All children from eighteen months to twelve years of age should have at least a pint and a half of milk a day. They need it more than any other single food, although it is perfectly true that after infancy milk is not the beginning and end of diet. It is also true that it is deficient of one very important mineral—iron, so that even small children must have fruit and green vegetables. But this fact should not make us forget the merits of good, clean, milk, including those unreplaceable milk products, butter and cheese.

Ice cream is an excellent food when it is a milk product and when eaten as food with other foods, but when, as often happens with poor ice cream, it is made from old milk or milk with a high bacterial count, it may be positively harmful.

If you have lost the milk drinking habit—you of any age—let us urge a reestablishment of it. Take milk on your porridge, your soup, in pudding or other desserts, oven dishes, every way you can.

Milk is an indispensable food for old and young. If you don't care to drink it, remember it is a necessary food. See that you get it every day in every way, if you would be better, and better.

THE BACKACHES OF WOMEN CAUSE GREAT SUFFERING

Women are the greatest sufferers from weak, lame and aching backs owing to the continual stooping, bending and lifting so necessary to perform their household duties, and these backaches are caused, without a doubt, by some derangement of the kidneys, for if there were not some weakness there the back would be strong and well.

will give positive relief and comfort to all weak, backaching, suffering women, and make their household duties a pleasure instead of a burden. "Doan's" are the original "Kidney Pills" having been on the market for the past 40 years. "Don't accept a substitute." Put up only by The T. J. Allura Co., Limited, Toronto, Ont.

We are glad that no serious results attended the runaway on Main street on Friday evening. The street did not afford a satisfactory race track, so the spirited team tried the C.P.R. They were soon captured.

SHORT SONG SERVICE

A short song service was held at the opening of the regular service in the United church on Sunday evening.

The minister, Rev. J. B. Howard, taking as his text, the words "Come unto Me, all ye that labor and are heavy laden and I will give you rest," stressed the love, reaching to mankind through the invitation and the assurance of guidance and support in the problems of life. Weariness of mind and body will come but irritation of the spirit will be absent if the right attitude is maintained. On the attitude of our mind the condition of our spirit through the initiation depends the "resting" given with the acceptance of the invitation. Jesus' love for mankind is the magnet drawing toward acceptance—His "resting" is the gift and our being yoked together with Him in work, the great privilege—the learning of Him "resting all who come."

OBITUARY

HARRY A. SILVER

Harry A. Silver, son of the late James Silver and Mrs. Silver, of Millet, passed away in an Edmonton hospital on Thursday of last week, in his 23rd year. He leaves to mourn his loss his mother, two brothers, Ordian and Alton, and two sisters, Jessie and Gladys. His father predeceased him three years ago. The funeral services were held on Sunday afternoon from the Millet Union church, Rev. J. B. Howard officiating. Interment was in the Millet cemetery.

There was much sorrow in the district when the news of the death of Harry Silver was made known here. Harry has had a hard fight for life for several months. The best medical aid that was known was summoned for his relief, and at times it was hoped that he was gaining. He was taken to the University hospital two weeks ago, where he could have every chance possible, but he gradually failed and passed away on Thursday, September 17.

The funeral services were held on Sunday last at two o'clock in the Millet United church, when Rev. J. B. Howard conducted the services. A solo by Miss McEwen was much appreciated. There was a very large attendance of people from the district, indicating the high esteem in which the young man was held.

HILLSIDE

We are glad to welcome back our old friends, Mr. and Mrs. C. L. March from an extended trip to Eastern Canada and the States.

A number of the Women's Institute members attended the institute conference in the community hall at Millet on Monday of last week. Mrs. Leslie Marr was elected convener of education and better schools.

Mrs. H. Marr and Mrs. E. R. Hoskins, Mr. H. Young and E. R. Hoskins will be delegates to the U.F.W.A. and U.P.A. convention to be held in Wetaskiwin on October 1st.

Mr. H. Marr and Master Lyle were visitors to Edmonton, last week.

Work is progressing very favorably on the new basement for the school house.

Mrs. H. G. Young has returned from a ten day visit with friends in Tofield and Crooked Lake.

Hillside will again give strong support to the school fair at Millet.

Our genial pastor, Mr. Howard, is continuing the Star club which was formed by the late pastor, Mr. Johnson. Meetings are held directly after school each Friday. This enables all the school children to attend if they wish.

At the last meeting the following officers were elected: Pres., Annie Deering; vice pres., Ella Huff; secretary, James Hoskins; treasurer, Ronald Hoskins. We are sure that this junior club will have the support of all the parents in this district.

The regular U.F.W.A. meeting was held at the home of Mrs. Howard Marr on Wednesday, September 15. The attendance was only moderate, owing to the climatic conditions. Mrs. E. R. Hoskins read an interesting paper on social welfare work. Mrs. Ross read a communication from the provincial health officer re addressing meetings on hygiene. This question was thoroughly discussed and it was decided to ask the cooperation of the Women's Institute in this matter. An enjoyable social hour was spent after the meeting. Mrs. Leslie Marr contributed piano solos and Miss Christie a reading. The hostess was assisted by Mesdames Bolt, Harkness, Hoskins and Leslie Marr.

WILL FIGHT TO MAINTAIN RATES

Edmonton, Sept. 19.—If by any chance the board of railway commissioners, as a result of the application of the Montreal board of trade, to be heard September 29, agrees to rescind the order effective last Tuesday, equalizing the rate of westbound grain and flour, with that eastbound, immediate application will be made to the privy council for the hearing of an appeal against this decision in order that the farmers of the west may not, without every possible effort to prevent it, lose the benefit of the equalized rate on this season's crop.

This decision was reached Thursday morning at a conference between Attorney-General Brownlee, of Alberta, S. B. Woods, K.C., Alberta's counsel in the freight rates case, and Attorney General Cross, of Saskatchewan.

MILLET LOCAL NEWS

Miss Annie Smith, of Larch Tree spent the weekend at her home.

Everybody came to the School Fair on Monday, September 25.

Mr. Ward was in town on Friday buying cattle.

Scharff Bros. have commenced threshing on their father's farm.

It will be of interest to know that Mr. Robert Young has received the appointment of police magistrate.

Miss Rupert and Miss Mullen were visiting at the home of Mrs. John Elder last week.

Mr. Gus Rinas, who has been at the Deer for the past few weeks, is at home for a few days.

Mrs. Disney was called to Edmonton on Monday owing to the illness of her daughter, Mrs. Kemby.

Miss Ingils of the staff of the Wetaskiwin schools, spent the weekend at her home.

Miss Fairy Roop returned to Wetaskiwin to attend high school, taking Grade XII work.

Mrs. Gwen Christie, teacher at the Hillside school, was at her home over the weekend.

Last week Mr. Ruben Plant and Mr. T. Wells paid a flying trip to the Pigeon Lake district.

Mr. H. C. Cooke, of the Cooke Drug Co., spent Thursday afternoon in the Millet store.

Miss Edith Cooke was a Wetaskiwin visitor to Edmonton during the past week.

Mr. and Mrs. Ennis of Leduc were recent guests at the home of Mr. Christie.

Mr. and Mrs. C. O'Donnell of Edmonton spent a few days the guests of Mr. and Mrs. R. P. Roop, returning on Monday evening.

Mrs. and Mrs. Lind and family have recently arrived from Salmon Arm, B.C., and are at present occupying the home of Mr. Scott.

Many narrow escapes from collision have been observed lately at the Karr corner. Just a tip to drivers of automobiles.

A dance will be held in Pinyon's hall on Monday evening, when Martin's orchestra will furnish their usual good music.

Rev. J. B. Howard, minister of the United church, attended the meeting of the Presbytery at Lacombe on Thursday and Friday.

Mr. J. B. K. Graham went to Lacombe on Thursday as lay delegate to the Presbytery, returning the same evening.

Mr. and Mrs. A. P. Mitchell, Alce and Fred returned from Ontario on Wednesday evening after a very delightful holiday.

McIntosh Reds are temptingly displayed in the local store windows, and they are just as delicious as they look.

Messrs. Moon Bros. had the misfortune to have a valuable registered Shorthorn bull killed by a northbound freight train on Saturday night.

The many friends of Mrs. Paul Dickman will be glad to know that she is at home and making a good recovery following her recent serious operation.

Mr. Dick Wagner suffered quite a severe injury to his hand last week. One of his pet pullets ranched on rather suddenly with a left hind, and Dick's hand was in the way. The injury is progressing satisfactorily.

Mr. and Mrs. March have returned to their home in the Hillside district, after spending a year in the Stratford and Toronto districts. We understand they intend to take up their residence here again.

WEDDINGS

ELDER — BOOTH

A quiet and interesting wedding ceremony was performed on Monday morning, when Mr. Robert Elder and Mrs. S. E. Booth were united in marriage, Elder John Benham officiating. The Millet Page extends congratulations and best wishes.

DRIVERS MUST KEEP THEIR HALF OF ROAD

Judge Mahaffy at Inisfail on Tuesday sustained the conviction of Mr. McPhee, west of Inisfail, who had been fined by Magistrate Oldham under the Motor Vehicles Act for obstructing the road.

It appears that Mr. and Mrs. Aspinall, Inisfail, were driving in their car on the generally used trail in the road when they met Mr. McPhee in his car. Mr. McPhee had been driving along also the generally used trail. This generally used trail was to the west of Mr. Aspinall's car. Mr. McPhee's contention was that he was entitled to half the used trail. Both the Magistrate and the Judge held that a driver was only entitled to his right hand side of the regular made roadway, and that he was not entitled to go over the centre line of the regular roadway, even if the used trail was across the centre line, in passing another car, unless his own side of the road was utterly impassable.

This decision is of interest to motorists and its observance is likely to save drivers trouble, where there is not opportunity or convenience for mutual accommodation.—Advocate.

Mr. R. P. Roop shipped a registered Poland China hog to Lacombe recently. He reports the market for pure bred stock brighter.

There is not a man or woman in the district who cannot get two dollars' worth of good out of this paper every year if they will but read it. The advertisements contain new value every week and the classified advertisements often point the way to clever buying or an opportunity for convenient disposal of property.

DEMONSTRATION IN COOKING WAS BIG ATTRACTION

The demonstration in cake making at the U.F.A. store was very interesting, particularly when trays of delicious cheese straws and generous pieces of cake were passed about for sampling.

Mrs. Prince expressed her appreciation of the attention given by the ladies, and the good attendance in spite of the discouraging weather. She urged the young ladies to begin cooking and to keep doing a little each week, in this way helping their mothers and, incidentally learning to cook.

Liberal space was given in the U.F.A. store for the demonstration, and prizes were given at the close for the best cake made by girls under fourteen years. The first prize, a set of cooking utensils, was awarded to Florence Lee, housewife in the second being equally divided between Ruth Easterbrook and Ruth Rowley.

CAMROSE PRESBYTERY

Camrose Presbytery of the Church of Canada met at the Methodist church here on Wednesday and was regularly constituted. There are 22 pastoral charges within the bounds of the new Presbytery. The minister of each charge together with a lay representative, comprised the personnel of the Presbytery. The meeting was convened under provisional chairman, Rev. Mr. Brownworth of Hurdley. Officers were elected as follows: Chairman of Presbytery, Rev. T. Phillips, Dayland; secretary-treasurer, Rev. J. MacGregor, Sedgewick; Principal Dr. Millar, Rev. Mr. Powell and Rev. Mr. Wilson attend the Presbytery in an advisory capacity and rendered valuable service in the formation of the new presbytery. Mr. Wilson, speaking in regard to the budget scheme of the United church, made an eloquent and forceful appeal for

the loyal and wholehearted support of the Presbytery, in their endeavor to meet their respective allocation. At the evening service, which was open to the public, Dr. Millar spoke on "The Significance of Union and What We Hope For". During their stay in Camrose, the delegates were the guests of the board and congregation of the Camrose United church.

C. E. Hibbs arrived in the district a few days ago to look after business interests and to renew acquaintances.

Advertisers know the value of the newspapers in their community. Subscribe for the newspaper that the merchants use for their advertising. Your printing should be done in good taste if you are to be satisfied with it. The printing executed at The Times office will compare more than favorably with that of other printing plants.

Provincial Weekly News Bulletin

New Milling Plant

Construction on the completion of Calgary's new milling plant, being built by Spillers of England, has been started, and the plant will be ready to handle the crop of 1926. The completion of the plant will cost \$800,000 and there will be \$2,000,000 in machinery.

World Poultry Congress

Alberta was represented last week by Hon. Geo. Howley, minister of agriculture, and J. H. Hare, poultry commissioner, at the meeting held in Toronto to consider plans for the 1926 poultry congress to be held in Ottawa next year. Hon. Mr. Howley advocated formation of provincial committees to cooperate with the central committee to make the congress a success, and the plan was given support.

Big Oil Output Continues

Royalite No. 4 well, in the Turner valley, 45 miles southeast of Calgary, is steadily maintaining its huge production of high grade naptha, as official figures on the August shipments from the well disclose.

The figures are based on actual shipments of naptha from the Black Diamond plant of the company. It is disclosed and show that the total shipped during August was 515,285 imperial gallons. This total, however, includes approximately 12,000 gallons of naptha produced by the absorption plant from wells 1, 2 and 3, so that the net total shipped from the separators taking naptha from No. 4 well was about 503,285 gallons. At 35 imperial gallons to the barrel this is approximately 14,379 barrels for August or 463 barrels per day.

Take Sighted Farms

About 100 farmers have taken land in the Lethbridge Northern Irrigation district. About 60,000 acres in this scheme are now under crop, an increase of 20,000 acres over the estimate for 1925.

Big Sheep Deal

A big sheep deal was arranged at Cardston last week between James Neilson, one of Southern Alberta's foremost sheep men for years, and W. E. Pitcher, prominent farmer and machinery dealer of Cardston. Mr. Pitcher purchased the entire flock of sheep and also the big lease on the Lethbridge and Red Deer from Mr. Neilson. The deal involved \$55,000.

Cooperative Loans in Good Shape
That practically every cent of money loaned by the provincial government to the sugar beet growers of the southern Alberta irrigation districts under the Cooperative Credit Societies' act this spring will be repaid when the returns from the present harvest are in, is the opinion of

W. V. Newson, deputy provincial treasurer, who has completed an inspection trip of the sugar beet districts. Approximately \$100,000 has been loaned sugar beet and other societies connected with that industry. Mr. Newson, during his inspection of the sugar beet districts in connection with the loans to the credit societies, found that a more than usual good crop is being expected. Harvesting is starting shortly and an average of 16 tons to the acre of beets is anticipated. Mr. Newson saw some fields which will go much higher, even as high as 25 tons to the acre.

The ordinary profit figured on an acre of sugar beets is from \$40 to \$50, but in some cases this profit will go as high as \$70 an acre.

New Salt Industry

What is destined to become one of Alberta's most important industries, and what is practically the first industry of consequence to be developed in territory tributary to the A. and G.W. line, is now in full swing. This is the salt plant of the Alberta Salt Co., at Fort McMurray, which is financed by Edmonton men.

The plant, which has been under construction for the past year or more at the salt wells on the Athabasca river just above Fort McMurray, has been in operation for some weeks, and is producing about 40 tons of salt per day. It is stated. It is hoped later on to be able to increase the capacity of the plant to about 75 tons per day.

Straw Paper Industry

As a result of successful experiments in the making of paper and paper products from waste straw in Alberta, which have been conducted under the auspices of the provincial government, the government is now making an effort to interest capital in the proposal to establish a plant played a pulp and paper engineer to a special report on the experiments has been made by Trade Commissioner Stutchbury, to Premier Greenfield.

Investigations were made into all known experimental processes for the manufacture of pulp from straw, and finally about two years ago the government made arrangements for laboratory tests of the Bache-Wig process. As a result of the success which attended the tests, the government employed a pulp and paper engineer to make a survey of the conditions necessary for the commercial success of a plant in Alberta. An exhaustive report has been received by the government covering a number of points in the province. This report together with all technical reports in being placed at the disposal of groups of capital who may be interested in the development of this important new industry.

Poultry Pool Signers Reminded of Meeting

Every contract signer of the Egg and Poultry Pool, and all others interested, are urged to be present at a meeting for the organization of a poultry marketing association for Wetaskiwin district, on Saturday, October 3, at 2 p.m. in the U.P.A. block. The meeting is called for the purpose of local organization, so the marketing association can get into operation as soon as possible. Other localities, Camrose, Ponoka and Millet, will possibly organize on the same date.
